Rewriting how we refill fountain pens

The Dracula Fountain Pen

Refillable Fountain Pen With Retractable Fang

Built-in, Ink-sucking Fang Mechanism

A revolutionary advancement to the classic fountain pen, with a built-in refill method

Resembling retractable vampire fangs that drain blood, the pen has a retractable needle to suck ink from the inkpot

VAMPIRE FANG FOUNTAIN PEN

classic fountain pen, modern convenience

Built-in retractable refill mechanism

Unparalleled convenience and clean refilling!

Simply unscrew the back end, extend the fang, place the tip in ink, and press the plunger to draw the ink inside

- no cartridge switching
- no wiping or dripping
- compatible with any brand ink
- use up to the last drop of ink in the inkpot

Advantages of the new refill method

CLEAN, FAST, CONVENIENT

Transfer of ink from an input to the pen is the most frustrating part of using fountain pens, but this method can be streamlined into one easy step, free of external pieces and wiping steps

Refilling made easier, with no wasted ink...

No more spills

No more spills while refilling

No more wiping

The needle is fine enough to stay clean

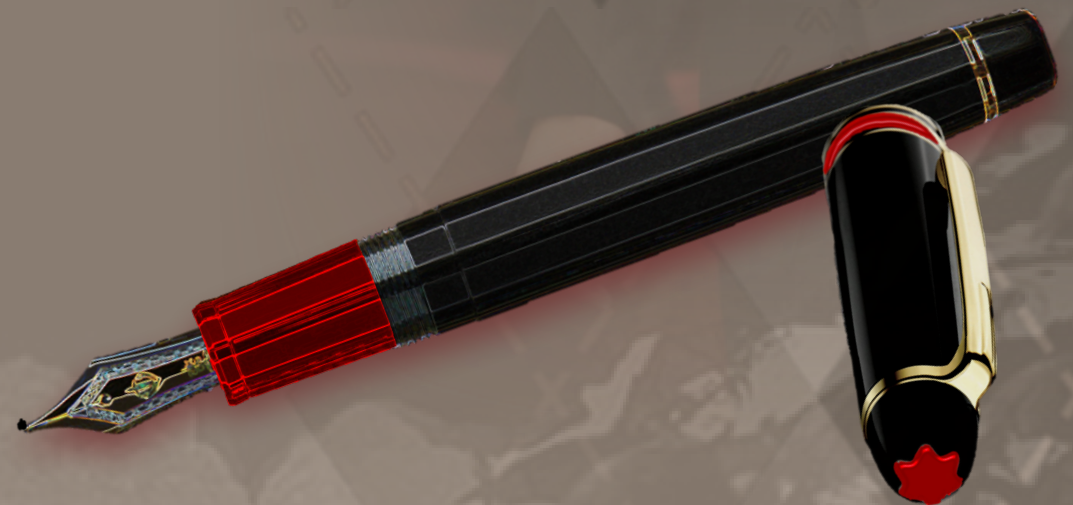

No wasted ink

Possible to use until the very last drops of ink in the inkpot

No more limitations for customers

Use any desired ink, no matter the brand

Plunging Method

1. depress the first plunger to extend the fang

2. depress the second plunger to suck ink into the cartridge compartment

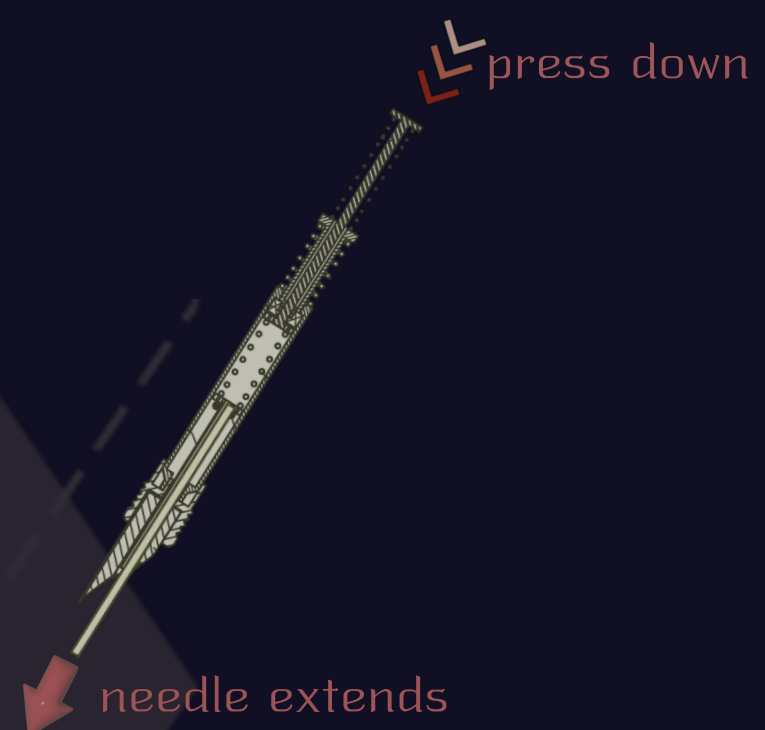

(place fang tip
in ink pot)

How it works

Extending the Fang

Unscrew the back of the pen, then simply extend the fang using the first plunger. The spring mechanism extends the needle out the tip of the pen.

Drawing in the Ink

The plunging of the second plunger then creates a vacuum inside the ink tube, and thus draws the ink into the pen.

Adjustable for Any Design

The extractable fang mechanism is purely interior, so any exterior design can be easily used

Great for collector's edition pens, but works with any standard pen for functional purposes

any exterior design, great for collector's editions
